

TERMS OF CHALLENGE

GLOBAL TRADING FUNDS
EMPOWERING TRADERS

The fairest 2 Stage demo challenge in history. 8% for first stage and 5% for the 2nd evaluation. No Broker tricks, Zero Spread. Zero slippage.

The GTF challenge is fully backed by Global Trading Funds liquid network fund with a 12 year history of funding and payouts without delay to traders

Winners receive a risk managed STP broker, funded by non winning challenge fees covering any drawdowns plus network funds to provide the margin for the account. Once the account is funded Global Trading Funds have no interest or control over the brokers STP, ECN or Liquidity Providers, therefore Global Trading Funds have no conflict of interest towards you nor derive any benefit from failure.

Global Trading Funds set evaluation parameters that correlate well with transitioning to real market success. We are paid by our copy investors per successful trader, so we choose to invest all fees collected into enabling the best traders to survive beyond the challenge. We want good signals not good fees for providing demo. Therefore we will always charge the lowest possible fees due to this unique model. If you find firms seemingly willing to offer you real risk capital for passing a demo without rigorous test, then please ask them why they need to charge such high fees, ask for proof of the real independent broker account they say they will provide if you are the few that make it. Then you are ready for Global Trading Funds.

With Global Trading Funds, after the first 30 days of trading on the real account, traders are able to request payouts directly from the broker.

We offer raw spreads, unlimited time as well as metals, indices and crypto. We invite you to exploit the market and become one of our many funded traders.
